

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

REGION II  
26 FEDERAL PLAZA  
NEW YORK, NEW YORK 10278

OCT 12 1990

CERTIFIED MAIL -  
RETURN RECEIPT REQUESTED

Re: Lone Pine Landfill Superfund Site  
Freehold Township, Monmouth County, New Jersey

Dear Sir or Madam:

This is to notify you of your company's (or your client's) potential liability with respect to the second operable unit remedy for the Lone Pine Landfill Superfund Site (the Site), and constitutes official notification that the United States Environmental Protection Agency (EPA) intends to initiate negotiations with a group of potentially responsible parties (PRPs) in order to achieve a settlement for private party financing or conduct of response actions at the Site.

Pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (CERCLA), 42 U.S.C. §9601 et seq., EPA will expend public funds for any corrective measures necessary to control the release or threatened release unless EPA determines that a responsible party or parties will properly perform such actions. Section 107(a) of CERCLA defines responsible parties as current and past owners or operators, persons who generated hazardous substances, or were involved in the transport, treatment, or disposal of hazardous substances at the site.

Under Section 107(a) of CERCLA and other laws, responsible parties may be liable for any costs incurred by the government in taking corrective actions at the site. The costs may include, but need not be limited to, expenditures for investigation, planning, cleanup of the site, and enforcement actions.

346140

If future response actions are performed by EPA rather than by the responsible parties, these parties may be subject to legal action pursuant to Section 107 of CERCLA, 42 U.S.C. §9607 to recover public funds expended by EPA in response to the release or threatened release of hazardous substances at the site.

The parties identified to date by EPA as PRPs for the Lone Pine Landfill site are named in Attachment 1 to this letter. Each addressee listed in Attachment 1 will receive a copy of this letter.

As you are aware, EPA issued a Record of Decision (ROD) in 1984 which selected the first operable unit remedy for the Site, consisting of a containment system for the Landfill. In the summer of 1989, EPA reached a settlement with 116 PRPs for construction of that containment remedy. That settlement was embodied in a Consent Decree which was entered in the U.S. District Court in Trenton, New Jersey in early 1990.

A second Remedial Investigation and Feasibility Study (RI/FS) was undertaken to assess the nature and extent of ground water contamination emanating from the Landfill. This work was done by one of the PRPs under EPA oversight. This investigation, known as the second operable unit, concluded that hazardous substances are migrating from the Landfill into groundwater and surface water. As described in EPA's letter to you dated July 16, 1990, EPA proposed a plan for remediation of contaminated ground water at the Site.

On September 28, 1990, EPA signed a ROD for the second operable unit at the Site. The major components of the selected remedy include:

- Extraction and on-site treatment of the contaminated ground water;
- Reinjection of the treated water back into the ground;
- Environmental monitoring of the aquifers and the Manasquan River, including additional sediment and biota studies; and
- Institutional controls to ensure the effectiveness of the remedy.

EPA estimates that the total cost of this response action, including design, implementation, operation and maintenance, will be approximately \$10.3 million. Copies of the second operable unit ROD are available for review at the three administrative record repositories noted in EPA's letter to you dated July 16, 1990.

EPA encourages your company or client, as a PRP, to undertake or finance voluntarily the response actions described above. EPA requests your cooperation in this matter, and urges you to meet with the other PRPs to discuss performance of the above response actions. In order to facilitate a settlement, EPA urges you to immediately contact one of the following PRP representatives and express your intention to enter into formal negotiations with EPA to resolve this matter:

Michael Brown, Esq.  
Thelen, Marrin, Johnson &  
Bridges  
805 15th Street, N.W.  
Washington, D.C. 20005

or

Robert Matthews, Esq.  
McKenna, Conner & Cuneo  
1575 Eye Street, N.W.  
Washington, D.C. 20005

Be advised that although Mr. Brown and Mr. Matthews have agreed to act as initial points of contact for all PRPs in this matter, EPA requests that you and all other PRPs for this Site identify a single party to represent the PRPs for purposes of negotiation with EPA. EPA does not intend to carry out separate settlement negotiations with separate groups of PRPs.

EPA plans to enter into formal negotiations with the selected PRP representative during the week of November 5, 1990. EPA is also requiring that a good faith proposal for settlement be submitted by the PRPs by no later than November 16, 1990. A good faith proposal is one whereby the PRPs demonstrate their qualifications, capability and willingness to implement or finance EPA's selected remedy, including reimbursement of costs for qualified third party oversight.

The Agency's objective is to complete negotiations, including finalization and signature of a Consent Decree, by no later than February 15, 1991. Be advised that EPA does not intend to carry out any negotiations with any PRPs to achieve a settlement for private party performance of the second operable unit remedy after that date. In addition, EPA also reserves the right to exercise other enforcement option(s) prior to that date if the negotiations do not proceed in a timely manner, if EPA does not receive a good faith proposal, or if the Agency concludes that there is inadequate participation by all PRPs in reaching a settlement. Consequently, it is imperative that you contact either Mr. Brown or Mr. Matthews as soon as possible to express your intention to participate in any potential settlement with EPA.

Under Section 122(e) of CERCLA, EPA has the discretion to invoke special notice procedures to formally negotiate the terms of an agreement between EPA and PRPs to conduct or finance response activities. EPA has elected not to use the special notice procedures set forth in Section 122 of CERCLA for the following reasons. First, all the PRPs receiving this letter have been contacted previously regarding their potential liability with

respect to the Site. In addition, a settlement has been reached with more than 100 PRPs for implementation of the first operable unit remedy. Furthermore, EPA sent all PRPs a copy of EPA's Proposed Plan for the second operable unit remedy in July, 1990. In summary, the PRPs have had ample opportunity to organize into a single cohesive group for the purposes of conveying to EPA any intention to perform or finance the second operable unit remedy at the Site. Consequently, EPA does not believe that utilization of the special notice procedures will expedite or facilitate settlement of this matter.

If you wish to discuss the matter in further detail, please contact Sharon Jaffess of my staff at (212) 264-2598, or William Tucker, Assistant Regional Counsel, at (212) 264-3268.

I appreciate your giving this matter your immediate attention.

Sincerely yours,

Richard L. Caspe, P.E., Director  
Emergency and Remedial Response Division
